Where is California water use decreasing?

Home / South Coast / Los Angeles Department Of Water And Power

Water consumption for Dec. 2015 in the Los Angeles Department Of Water And Power

decreased -13.72%

but the agency fell short of meeting

its 16.0% reduction target

11.942

13.842

billion gallons consumed in Dec. 2015

billion gallons consumed in Dec. 2013

The water use reduction target — approved by the State Water Resources Control Board this year in order to achieve a 25 percent reduction in water use statewide — is based on a June 11 revision tied to an average July through Sept. 2014 daily per capita residential water use rate of 90.00 gallons that places water agencies into nine tiers of reduction targets.

Average daily water use of each residential customer

The State Water Resources Control Board also collects a figure that represents the average daily water use of each residential customer for a given water agency. Comparing Dec. 2015 — the latest monthly data available — to Nov. 2015, average daily per capita residential water use for the Los Angeles Department Of Water And Power decreased.

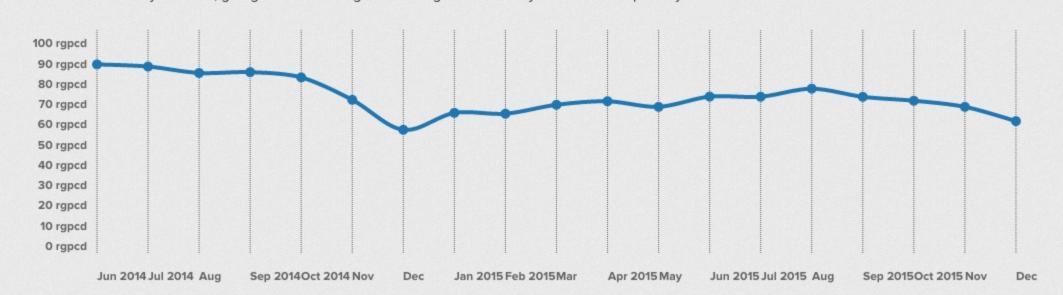

65.06

average daily gallons per resident for Dec. 2015 72.10

average daily gallons per resident for Nov. 2015

Residential customers in the Los Angeles Department Of Water And Power used -2.41% less water in Dec. 2015 when compared to the statewide average daily per capita residential water use of 66.66 gallons.

Here's a view of average daily per capita residential water use over the past 19 months. Water use by this agency's residential customers has decreased by -30.07%, going from an average of 93.03 gallons used by each resident per day to 65.06.

Enforcement statistics

This table displays selected enforcement statistics reported by water agencies to the State Water Resources Control Board.

Conservation incentive programs

The city of Los Angeles offers homeowners rebates on soil moisture sensor systems, sprinkler nozzles, and rain barrels through MWD's SoCal Water Smart rebate program. Learn more about the conservation incentive program here.

A turf removal program also provides consumers with rebates for removing grass from their property and replacing it with a drought tolerant plants. Currently the rebate for residential customers is \$3 per square foot.

Learn more about the turf removal program here.

Here are some ways you can help conserve water

Turn the water off while brushing your teeth

- Last updated Nov. 2014

ng Water before 8 a.m. or after 8 p.m.

Wash only full loads

Repair broken sprinklers

About the data: This data is for urban water suppliers and is based on the most recent reports submitted to the State Water Resources Control Board. Since the gallons of water used per person per day measurement does not take into account rainfall, temperature, humidity and population density, the State Water Resources Control Board discourages comparisons between water suppliers.
